IQRASH JALIL

Full Stack Developer (MERN Stack)

SUMMARY

Experienced Full Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Adept at designing, developing, and maintaining web applications with a focus on scalability and performance.

EDUCATION

COMSATS University, Vehari Campus

Bachelor's Degree in Software Engineering
2020– 2024

SKILLS

Frontend: React.js, JavaScript, Redux, Tailwind CSS, Bootstrap, Socket.IO

Backend: Node.js, Express.js, REST APIs, WebSockets

Database: MongoDB

Tools: Git, GitHub, Postman, Insomnia

EXPERIENCE

Full Stack Developer

Evelogics - Islamabad, Pakistan (2023 - Present)

- Developed responsive interfaces with React.js and Tailwind CSS, improving user engagement.
- Created RESTful APIs with Node.js and Express, enabling smooth front-end and back-end integration.
- Enhanced code quality and project efficiency by following Agile practices and conducting code reviews.

Full Stack Developer

Redis Solutions - Rawalpindi, Pakistan (2022-2023)

- Built and optimized full-stack web applications using the MERN stack, enhancing performance and user experience.
- Leveraged MongoDB for efficient data management, ensuring fast data access and secure storage.
- Collaborated with cross-functional teams to deliver robust, secure applications.

PROJECTS

Dukaan.pk - E-commerce App [Try it here](#)

- Integrated Stripe for secure payments, implemented a responsive search with advanced filtering, and developed a user-friendly cart system. Enabled user reviews and ratings to foster customer trust. Designed an intuitive admin panel with CRUD operations for managing products, orders, and real-time updates.

MovieMingle - Movie Downloading App [Try it here](#)

- Built using TMDB API for dynamic movie data, with user-driven requests for new titles and advanced filtering by year, ratings, and genre. Designed an admin panel for seamless content management, including movie requests and updates.

TeamTrack - Project Management Tool [Try it here](#)

- Developed dynamic team assignments for effective project handling, with role-based access control and image storage via Cloudinary. Integrated task progress visualization with @ramonak/react-progress-bar for streamlined project tracking.

Textify - Real-Time Chat Application

- Built a real-time messaging app with Socket.IO and Redux, featuring seamless, scroll-to-latest message loading, lazy loading for message history, and contact management. Implemented intuitive chat selection to manage contacts and channels separately, enhancing user experience.

StreamSupport - SuperChat Alternative for Pakistani Streamers - [InProgress](#)

- Built a donation and SuperChat-style platform for streamers in Pakistan, where YouTube's SuperChat is unavailable. Streamers receive two links: an overlay link for OBS to display donations in real-time on stream, and a public donation link to share with viewers. Viewers are redirected to a page to donate to their favorite streamers, triggering a customizable alert with optional audio notifications. This system empowers streamers with engaging donation options, fostering a more interactive live streaming experience.
